

FIN  **ABLERS**
Enabling Solutions

- Our Vision is to spread awareness about financial concepts and stress on the importance of Financial Freedom to the students predominantly from class VIII to X
- Financial literacy, as a subject is generally not a part of regular curriculum for the schools. Therefore, we believe that our experience and expertise can be shared with the students at the right ages. We believe this would benefit the students in future.
- We also believe in engaging with the students in a very interactive manner to cover all necessary basic concepts related to finance and bring out its importance
